

Protect your students and staff from viruses, bacteria, and pathogens with tested, industry proven filtration technology.

The EduAir Hanging/Ducted Air Cleaner was specifically engineered for schools looking for the safest, most effective and efficient solution for air-purification needs.

With a powerful 1250 CFM blower, air is pulled through the 99.99% efficient, high-capacity V-Bank HEPA filter to eliminate any airborne threat in your cafeteria, gym, or auditorium and provide students medical-grade clean air.

The EduAir Hanging/Ducted Air Cleaner conducts 10 Air Changes per Hour (ACH).

This is the same rate of purification used in hospital sterilization rooms and food preparation areas.* A typical office building requires only 2-4 ACH.
